**THE MOST
ADVANCED
DECK
COATING
EVER.**

Encore, a leading manufacturer in composite coatings, is proud to introduce the next generation in its line of quality refinishing products for wood decks and docks.

Encore is a composite coating that resurfaces old wood decking. Encore forms a durable, low-maintenance and skid-resistant finish that lasts for years.

New for 2013 is a re-engineered blend of proprietary resins and other ingredients that usher in a new era in deck protection.

**Encore Technologies
make the difference.**

Infinicolor™

Tint to any color under the sun by adding a gallon of latex paint to the Encore kit. Your creativity is endless.

Thermal-Smart™ 

New technology that keeps Encore cooler on hot summer days.

Elastix™ 

A technology that improves elasticity by over 500%. The result? A dramatic extension of service life.

Splinter-Tight™ 

New adhesives in Encore protect bare feet by locking down harmful splinters and creating a safe, skid-resistant walking surface.

BEFORE

PROBLEM

AFTER

SOLVED.

A WARRANTY WITH TRUE PROTECTION.

Your residential application is guaranteed for as long as you own your home. Commercial applications: 10 Year Warranty.

TIPS

- Properly clean and prepare deck surface (see FAQs)
- Applies best between 40-80°F.
- Applies best with a 1/2"-3/4" nap roller.
- Following common painting practices, use a brush to cut in areas before rolling Encore.
- Apply two good coats, filling in checks.
- Avg. Daily Completion Rate: 1,500-2,000 square feet.
- Allow to dry 24 hrs before replacing furniture.
- Clean up with water.

RECOMMENDATIONS

PRETREAT. Use on older wood to extend kit coverage and improve adhesion.

POLYMATRx saves money and ends paint maintenance. Use it on handrails or any other painted surface.
